## Description

With the aim to create products that leave the smallest possible footprint on the environment, the flat-packed series, which started with No.111, has now been expanded. The No. series are not assembled on delivery to minimise the environmental footprint during transport. By creating a series of flat-packed lamps,

the user is invited to participate in the creation of the lamp at home and can play with the materials and shapes that help define Tom Rossau's design universe. All the birch lamellae used for the lamps in the No. series are cut with a circular stroke, creating a rounded edge at each end.
